Pearson mastering physics textbook pdf

Today, reaching every student can feel out of reach. With MyLab and Mastering, you can connect with students meaningfully, even from a distance. Built for flexibility, these digital platforms let you create a course to best fit the unique needs of your curriculum and your students. Each course has a foundation of interactive course-specific content — by authors who are experts in their field — that you can tailor and assign as you see fit. Digital tools activate learning, to more fully engage learners. And online assessments and data tell you how students are doing, as they go, so you can decide what to teach and how best to teach it. The result? Personalized learning that reaches every student. Whether you have five students or 500, MyLab and Mastering can help you deliver the outcomes you aspire to. Learn more about the features and benefits of MyLab and Mastering. ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. NOTE: Make sure to use the dashes shown on the Access Card Code when entering the code. Student can use the URL and phone number below to help answer their questions: 800-677-6337 Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. 0134702352 / 9780134702353 MasteringPhysics with Pearson eText -- Standalone Access Card -- for College Physics: A Strategic Approach, 4/e Package consists of: 0134610563 / 9780134610566 MasteringPhysics Content -- Access Card Package Sales Accumulator -- for College Physics: A Strategic Approach, 4/e 0134671023 / 9780134671024 MasteringPhysics -- Pearson eText 2.0 Upgrade -- for College Physics: A Strategic Approach, 4/e "synopsis" may belong to another edition of this title. Language: English. Brand new Book. For courses in calculus-based physics. Practice makes perfect: Guided practice helps students develop into expert problem solvers Practice makes perfect. The new 15th Edition of University Physics with Modern Physics draws on a wealth of data insights from hundreds of faculty and thousands of student users to address one of the biggest challenges for students in introductory physics courses: seeing patterns and making connections between problem types. Students learn to recognize when to use similar steps in solving the same problem type and develop an understanding for problem solving approaches, rather than simply plugging in an equation. This new edition addresses students' tendency to focus on the objects, situations, numbers, and questions posed in a problem, rather than recognizing the underlying principle or the problem's type. New Key Concept statements at the end of worked examples address this challenge by identifying the main idea used in the solution to help students recognize the underlying concepts and strategy for the given problem. New Key Example Variation Problems appear within new Guided Practice sections and group problems by type to give students practice recognizing when problems can be solved in a similar way, regardless of wording or numbers. These scaffolded problem sets help students see patterns, make connections between problems, and build confidence for tackling different problem types when exam time comes. The fully integrated problem-solving approach in Mastering Physics gives students instructional support and just-in-time remediation as they work through problems, and links all end-of-chapter problems directly to the eText for additional guidance. Personalize learning with Modified Mastering Physics By combining trusted author content with digital tools and a flexible platform, Mastering personalizes the learning experience and improves results for each student.Now providing a fully integrated experience, the eText is linked to every problem within Mastering for seamless integration between homework problems, practice problems, textbook, worked examples, and more. You are purchasing an access card only. Before purchasing, check with your instructor to confirm the correct ISBN. Several versions of the MyLab(TM) and Mastering(TM) platforms exist for each title, and registrations are not transferable. The Editorial team at Pearson has worked closely with educators around the world to include content which is especially relevant to students outside the United States. For courses in calculus-based physics.This package includes Pearson Modified Mastering Physics. Practice makes perfect: Guided practice helps students develop into expert problem solversThe new 15th Edition of University Physics with Modern Physics, now in SI Units, draws on insights from several users to help students see patterns and make connections between problem types. Students learn to recognize when to use similar steps in solving the same problem type and develop an understanding for problem solving approaches, rather than simply plugging values into an equation. This edition addresses students' tendency to focus on the objects and situations posed in a problem, rather than recognizing the underlying principle or the problem type. New Key Concept statements identify the main idea used in examples to help students recognize the underlying concepts and strategy. New Key Example Variation Problems within new Guided Practice sections group problems by type so students recognize when problems can be solved in similar ways, regardless of wording or numbers.
